## NAoMe Newsletter, January 2026

### Highlights

- 1 Updated Quarterly Reports
- 2 Events
- 3 Upcoming Publications
- 4 Quality Improvement

### Updated Quarterly Reports

National Audit of Metastatic Breast Cancer - Quarterly Report (01-10-2021 to 30-09-2024)  
Percentage of people with newly diagnosed metastatic breast cancer discussed at a multidisciplinary team (MDT) meeting within 30 days of diagnosis at North Central London Cancer Alliance

We're pleased to share that the quarterly Data Dashboards from the National Audit of Metastatic Breast Cancer (NAoMe) have been updated, now covering the period Q4 2021 – Q3 2024.

**What's new:** We've added confidence limits for all performance indicators (for both Trust and Cancer Alliance results), which provide additional context for interpreting your results.

You can access the dashboards [here](#)

### Events

#### The UK Interdisciplinary Breast Cancer Symposium Jan 19th & 20th 2026

The NAoMe team was delighted to attend the UKIBCS in January, where we shared updates through oral presentations, as well as at our exhibition stand.

Thank you to all who visited us. We hope you will continue engaging with your data and explore how it can support quality improvement.

### Quality Improvement Work

A key focus is rigorously examining the rates of treatment initiation with CDK4/6 inhibitors within 12 months of diagnosis. This analysis will help us understand adherence to clinical guidelines, identify potential variation in practice, and ultimately ensure optimal timing of systemic therapy for eligible patients.

Success hinges on complete data. Please review data quality and ensure accurate submission for CDK4/6 inhibitor use. Your involvement is crucial and you can contact us at [breastcanceraudits@rcseng.ac.uk](mailto:breastcanceraudits@rcseng.ac.uk) to explore how we can support your organisation.

### Upcoming Publications

#### ABS Yearbook

The 2026 Association of Breast Surgery (ABS) Yearbook is due to be published in the first week of February 2026.

This year's core audit section features detailed summaries from NAoMe and its companion primary breast cancer audit, NAoPri, highlighting key findings and recommendations from the 2025 State of the Nation publications.

The yearbook will be freely available to all ABS members.

To access the Yearbook, simply log in to the ABS website and navigate to the "My ABS" section, where you'll find the link under "Yearbook."

Keep an eye out for this valuable update to your library of clinical resources!
